## 3 easy ways to secure your K-12 school district

Some solutions promise to check all the boxes on network security. But it turns out, they're checking all the wrong ones. Experiencing these frustrations? Cisco Umbrella can help.

### 1

#### Get up and running quickly.

- ✓ Improve productivity, simplify student and staff collaboration while reducing on-premises IT costs.
- ✓ Secure student welfare on and off-campus.
- ✓ Protect student records, personally identifiable information (PII), and protected health information (PHI).
- ✓ Get a quick return on your investment.

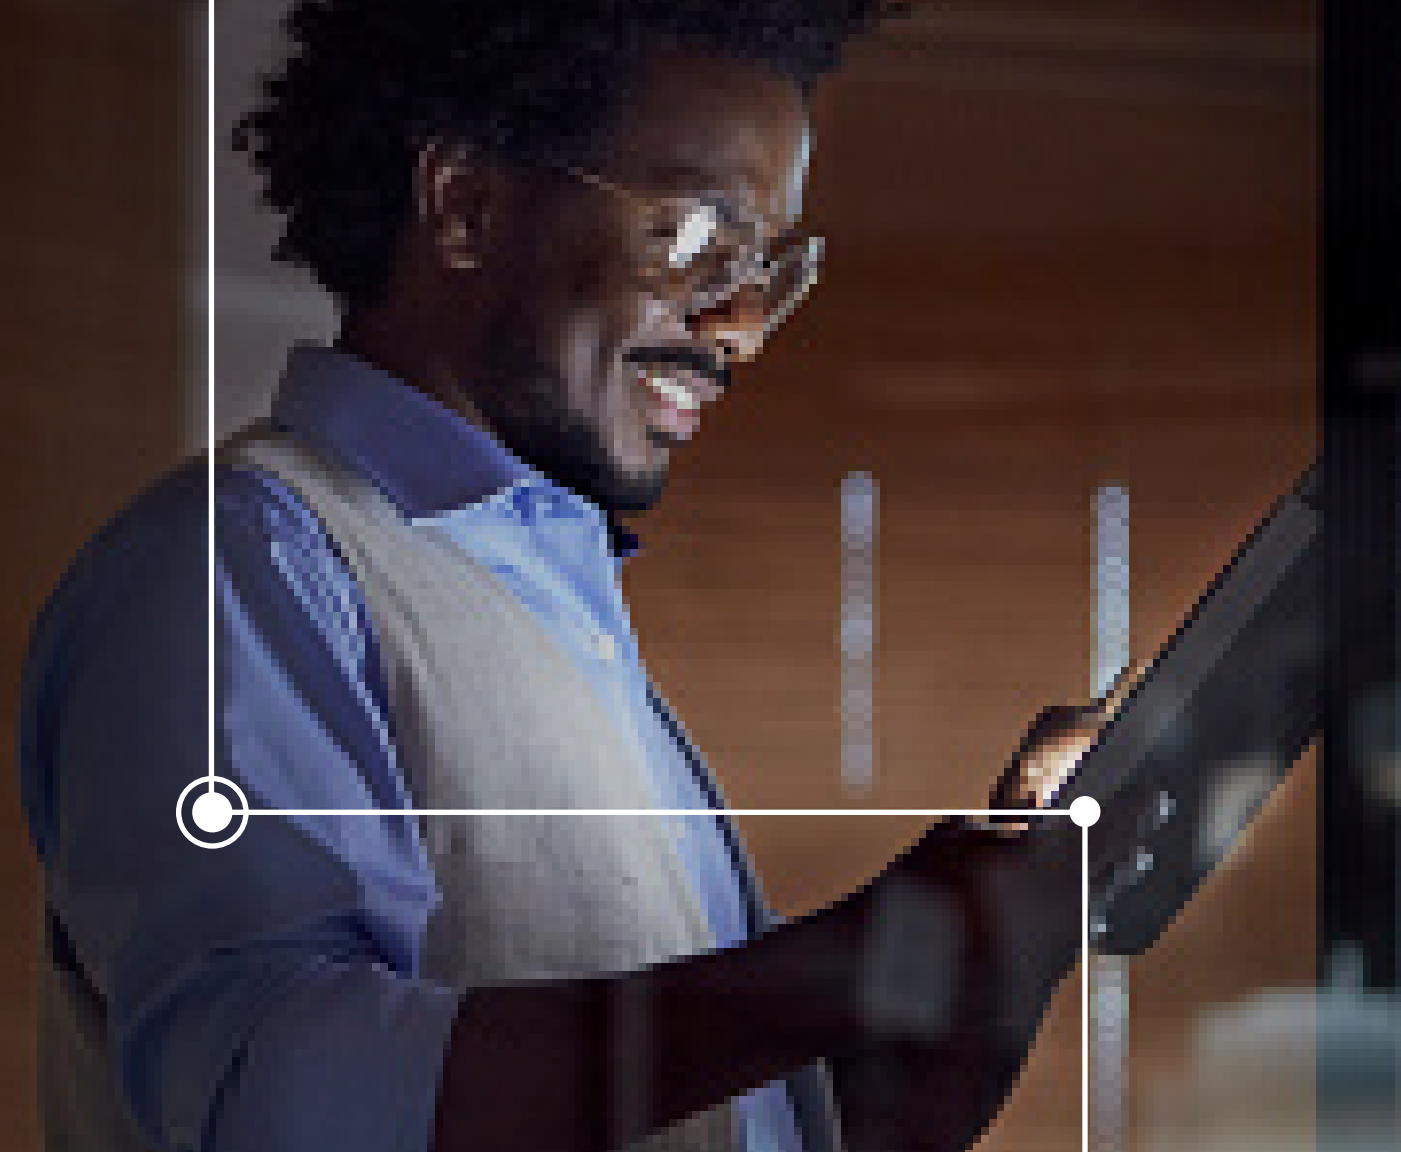

Deployed in three simple steps, Cisco Umbrella secures your entire school district in minutes.

No hardware to install. No software to maintain. No hassle.

“Deploying Umbrella was so easy that we were unprepared for the dramatic and immediate results it netted. We did not expect a single product to move the needle so much or so fast.”

- Chris Langford, Director of Network, Infrastructure and Cyber Security  
Lewisville ISD<sup>1</sup>

#### Simplify management and gain peace of mind.

### 2

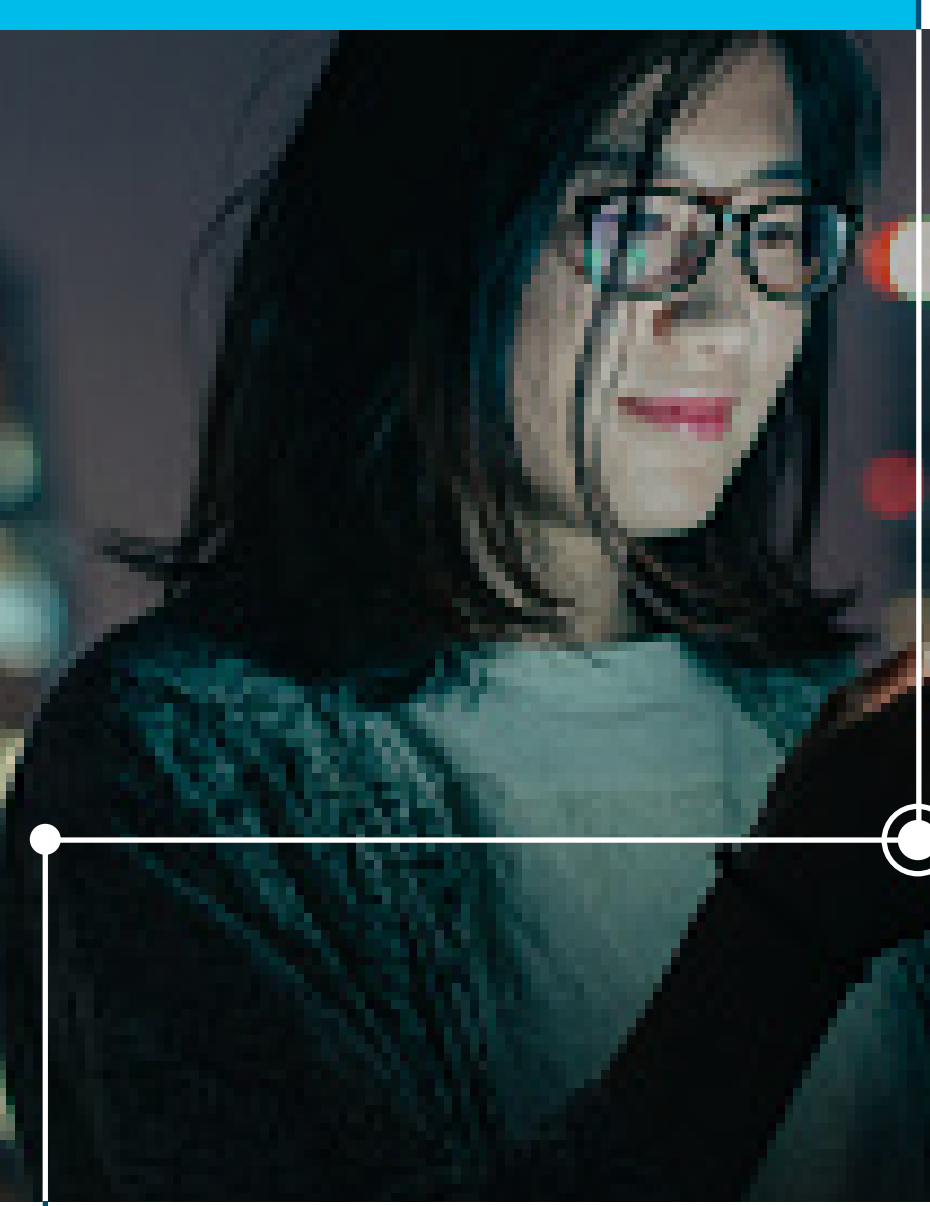

With Umbrella, you can protect against phishing attacks, support customizable content category filtering, and gain per-user visibility and policy on Windows, Mac, or Chromebook devices – on or off-campus.

- ✓ Simple to use, simple to manage. Put an end to time-consuming, complex security products.
- ✓ Reduce security alerts, gain context and prioritize what to fix first.
- ✓ Integrate easily with your existing security investments making it easier to protect student and staff data.
- ✓ Secure school networks with confidence with 100% uptime. Your schools will remain secure with no fear of equipment failure or maintenance issues.

“After deploying Umbrella, we saw a 75% reduction in malware tickets for our faculty and staff.”

- Chief Information Security Officer, Educational Institution<sup>2</sup>

### 3

#### Eliminate gaps in visibility and coverage.

- ✓ Protect against threats before they've reached your network.
- ✓ Secure roaming students and staff effectively, anywhere they access the internet.
- ✓ Deliver reliable off-network coverage across all internet-connected school and staff devices.
- ✓ Utilize threat intelligence that relies on predictive machine learning instead of an outdated signature-based approach.

Built into the foundation of the internet, Cisco Umbrella acts as your first line of defense against threats – blocking threats before they become attacks, and securing students and staff anywhere they go.

“Umbrella’s extension for Chromebooks has allowed us to tie an ID to an IP and better track our students.”

- Network Engineering, Educational Institution<sup>3</sup>

Secure staff and students with ease.
